- Knowledge in web development with React, TypeScript;
- Experience with team management;
- Intermediate/advanced English proficiency.

EXPERIÊNCIA PROFISSIONAL

uRock Progaganda e Marketing LTDA · 08/2010 - Present

Managing Partner

I started at the company as a web designer, working on layout creation and website development, as well as other areas of design such as graphic design and motion design.

In 2013, I was promoted to the position of art coordinator and managed a team of designers, delegating tasks, reviewing, and approving artwork.

In 2015, I became a partner in the company and, in addition to my existing responsibilities, I also began interacting with clients, receiving briefs, participating in project discussion meetings, and providing quotes.

One of the greatest projects I developed at the company was a PHP web app for a large client's sales campaign. This campaign was chosen by the client as the best internal project of the year.

Quatro Seniors Informática LTDA · 12/2008 - 01/2010

Graphic Designer Intern

I worked on layout creation and website and web application development.

One of the projects I developed was a system in PHP using the Joomla CMS to encourage employees of a large company to engage in sports. The exercise time reported by them was converted into mileage, and through integration with the Google Maps API, a route to Cape Town was generated.

Editora Segmídia LTDA · 11/2006 - 07/2008

Graphic Designer Intern

I worked on layout creation and website development for small publications.
